SAT MATH I™

by Eileen Shapiro

The fast, effective way to improve your math SAT score.

microlearn™

THE COMPUTER EDUCATION DIVISION OF MICROLAB, INC.

SAT MATH I™

by Eileen Shapiro

Unique instruction and test mode format helps you learn faster, learn more and raise your math SAT score.

The minute you start using SAT Math, you're on your way to a better score on the Scholastic Aptitude Test (SAT) of the College Entrance Examination Board. Every type of question you'll face in the math section of the actual SAT exam, you'll see in SAT Math first. So you'll really be prepared.

SAT Math helps you like many other math tutorials can't. Because in addition to a test mode, SAT Math has an instruction mode that provides clear explanations for each answer you choose. Even incorrect ones.

This unique tutorial format helps you learn faster than simple self-testing. SAT Math tells you *why* the answers you select are correct or incorrect.

With SAT Math, you may even want to go back and select incorrect answers on purpose just to see all the explanations. It's a great way to increase your understanding of a given math operation. And when you sit down to take the actual SAT exam, your chances for a higher score are bound to increase.

SAT Math can help you improve your score in all these areas:

- **Arithmetic**
- **Algebra**
- **Plane geometry**
- **Probabilities**
- **Exponents**
- **Square root**
- **Fractions**
- **Quantitative comparisons**
- **Ratios**
- **Negative numbers**
- **Least common multiplier**
- **Graphs**

U.S. CONSTITUTION

TUTOR

By Myrna Helfand

Improve your score on any U.S. Constitution Test

micro learn™
THE COMPUTER EDUCATION DIVISION OF MICROLAB, INC.

U.S. CONSTITUTION TUTOR™

by Myrna Helfand

Unique instruction and test mode format helps you learn faster, learn more and raise your test score.

Whether you are a high school, junior high or college student...a teacher, future citizen or just interested in a more thorough understanding of the U.S. Constitution, this tutorial will help you increase your knowledge and your test score.

You can study on the beginner, intermediate or advanced level. The U.S. Constitution Tutor even helps you determine where you should begin by offering a diagnostic test mode.

Later, you can switch to the instruction mode where you'll not only get correct answers, but complete explanations. So you're sure to understand *why* your answer was right or wrong.

However, you may want to choose incorrect answers on purpose. That helps you understand why certain answers that may seem correct really are not.

U.S. Constitution Tutor is effective on an individual basis, or in small study groups. Group use stimulates thinking, discussion and enthusiasm.

The author of U.S. Constitution Tutor, Myrna Helfand, is a veteran of over 12 years public school teaching and holds an M.A. degree in U.S. History. Let her help you improve your score!

SAT ENGLISH I™

By Eileen Shapiro

A fast, effective way to improve your verbal SAT score

microlearn™

THE COMPUTER EDUCATION DIVISION OF MICROLAB, INC.

SAT ENGLISH I™

by Eileen Shapiro

Unique instruction and test mode format helps you learn faster, learn more and raise your verbal SAT score.

This is much more than an English test similar to the Scholastic Aptitude Test (SAT) of the College Entrance Examination Board.

Unlike English tutorials that merely drill you and show correct answers, SAT English I has an instruction mode as well as a test mode. The instruction mode gives you explanations for each multiple-choice question. So whether or not you choose the correct answer, you'll always understand the reasoning behind the correct answer.

Switch to the test mode and you can see how much you know before—and after—you have worked in the instruction mode. It's a good way to track your progress.

SAT English tests and tutors you in each of the areas you'll encounter when you take the actual SAT. Vocabulary, reasoning, interpretive ability...all these critical skills are developed as you use SAT English. And most importantly, you learn *why* one answer is better than the others...a key technique for improving your verbal SAT score.

Here is a personal tutor that helps you to learn as much through incorrect answers as correct ones. In fact, you can choose the wrong answers on purpose and continue to learn from the explanations given.

SAT English I. If you're facing SAT's, it's as good as a real live tutor. Maybe better.

Improve your verbal SAT score in all these areas.

Grammar hones the underlying skill you must have to do well in every section of the SAT verbal test.

Antonyms teaches you to recognize words that have similar or opposite meanings.

Analogies explains how to identify similarities of meaning between sets of words or phrases.

Reading comprehension shows you how to draw conclusions and understand what a writer is trying to tell you.

Sentence completion shows you how to spot shades of meaning and why some answers that seem correct are not.

LifeSaver

FIRST AID FOR BLOWN DISKS

The data recovery program that works right down at the nibble level

micro lab™

THE BUSINESS SYSTEMS DIVISION OF MICROLAB, INC.

LifeSaver™

The program that reconstructs missing data right down at the nibble level.

Unlike other data recovery programs that only recover lost data at the file level, LifeSaver also can recover data at the nibble level. So when you have a problem and other programs can't help, LifeSaver often can.

Here's how.

First, LifeSaver checks your drive timing to see if that is the problem. If the drive's OK, LifeSaver loads to memory. Then you can remove the LifeSaver disk and insert your problem disk. If you have a second drive, insert a blank disk to record the data that LifeSaver retrieves.

LifeSaver will search for magnetic "markers" on your problem disk. If some are missing or destroyed, LifeSaver can read adjacent markers and reconstruct some or all of the missing data.

LifeSaver actually makes judgements and determines what the missing markers probably were, so you can retrieve data that normally can't be read. No other program we know of can do this.

While LifeSaver works, it displays a progress report on your screen. So you can see the extent of your problem and how much data you will retrieve.

Smoke, spills, static electricity, stray magnetic fields and greasy fingers are never going to disappear. But now you can get first aid to bring many lost-data problems under control. With LifeSaver. The name says it all.

- **You don't have to be a data base architect to use LifeSaver.**
  LifeSaver works automatically. Boot it up and LifeSaver does the rest.
- **You get an on-screen status report on your problem.**
  A simple letter code shows you the extent of your data problem and approximately how much data you can recover.
- **LifeSaver actually can reconstruct data that normally can't be read.**
  LifeSaver makes judgements! It finds magnetic markers adjacent to destroyed markers and reconstructs the missing data.
- **LifeSaver can reconstruct data at the nibble level, not just the file level.**
  No other data recovery program we know of can recover as much data from open disks.

TAX·MANAGER™ gives you the most comprehensive, easy-to-use manual—Plus exclusive operating features...

HERE'S THE COMPLETE PACKAGE:

Master and back-up disks along with our illustrated manual that is written in easy to follow language so that it can be understood by people at any level of computer experience. There's even a sample taxpayer with full information to help you.

SO COMPLETE... SO VERSATILE

- **Automatic recalculations**—for the page you're viewing and all other pages and forms.
- **Automatic sequence display**—so you can view multiple tax forms in sequence without returning to the menu.
- **Double printing option**—print a copy of the tax page displayed or print out entire forms in IRS approved formats.
- **Simplified data input**—lets you enter data on any schedule or form on any line number at any time. Sections of schedules are automatically divided into easily handled "pages" that flip quickly forward or backward.
- **Easy editing**—of each line number of data, changing either description and figures or both. On-screen "control panel" reminds you of appropriate prompts. Switch easily between taxpayers' files on the same or different disks via a menu option. No need to keep handwritten lists and no limit to the data disks you may maintain.

BACKUP PROTECTION PLUS NEW VERSIONS FREE!

TAX·MANAGER comes to you with a one-year Extended Warranty that replaces any new updated versions FREE.

TAX·MANAGER State Tax Versions are available for most states. Ask your dealers for details.

Supersonic action as up to 8 jet jockeys fight it out in the clouds

DOGFIGHT II

micro fun™

THE COMPUTER ENTERTAINMENT DIVISION OF MICROLAB, INC.

DOGFIGHT II™

The original air-to-air combat adventure ...a supersonic skill and thrill game

Strap in. Secure your canopy. Fire up your jets...and kaa-choom! You and your supersonic fighter hurtle into the skies as one.

Soon you sight the enemy...and he sees you. He drops, he rolls, he maneuvers desperately to get out of your sights.

But you're too clever for him. You press your firing button. Scratch one! But wait, he's bailing out. Now you must hit the parachute or the enemy pilot may come back in another aircraft.

Of course, the enemy has an elite fighter corps, too. So while you're shooting at them, they're trying to down you.

You can join the battle all by yourself. As part of a squadron. Or you can choose sides and up to eight jet jockeys can join the Dogfight at once.

You can even enjoy a bonus game. Now you're on the ground defending your turf with anti-aircraft cannon fire against the invading enemy planes.

Dogfight II. Rapid-fire thrills in the wild blue yonder. Sign on and take off!

Available for Apple II & IIe

Death in the Caribbean

A death-defying island treasure hunt
with high-resolution color graphics

micro fun™
THE COMPUTER ENTERTAINMENT DIVISION OF MICROLAB, INC.

Death in the Caribbean™

A game of strategy, courage and high adventure...with more than 100 different high-resolution color screens

You're on a lush, lost island in the Caribbean. You, a buried treasure and unspeakable terror. Something inside you whispers that your life is in danger. Which path should you take through the twisted jungle?

It will take all the courage and cunning you can muster to get down the cliff without falling to your death. Cross the bottomless crevasse. Get through the quicksand. Avoid the man-eating ants. Conquer the crocodile-filled swamp. Escape the deadly voodoo cave, menacing pirate ghosts and all the other lethal traps and pitfalls in your path.

Can you turn the clues you find into the tools you need to grab the treasure and get off the island alive?

This is a game for the brain. All you have are your wits and the treasure map you get with the game.

So visit our little island if you dare. But heed this warning. If you seek and fail, you may be doomed to remain and play the game forever.

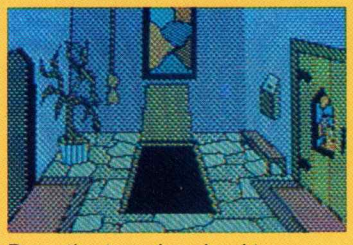

How will you cross the bottomless crevasse?

Do man-eating crocodiles lurk in these waters?

Does the trap door lead to treasure—or death?

A friendly ghost—or have you come to your doom?

Now your Colecovision™ can get maxi-action from Microfun™!

Before, only IBM™ and Apple™ owners could enjoy the maxi-action of Microfun™. If you had a Colecovision™ you were left out. No more! Here's four new games for Colecovision™ you can get only from Microfun™. Each game takes full advantage of Colevision's™ features with full-color and full-resolution super graphics. The games you have been waiting for from the leaders in computer assisted entertainment, Microfun™.

All the lights, bells, buzzers and flipper action of a heavy-weight arcade pin ball machine — right on your Colecovision™. You've got to be faster than fast, or you won't last!

Bounty Bob's taken a fireman's job in the city to fund the chase for Yukon Yohan. Will you burn out before helping Bob rescue Miss Betty's poodle from the burning skyscraper? Or will you go down in flames in the collapsing stairways, crashing elevators and water hazards?

It's the legendary mounty, Bounty Bob! You've got to help him track Yukon Yohan through an abandoned uranium mine — all ten levels of it! — grabbing buried treasure and avoiding deadly radioactive mutants along the way. If you're a video gamer who likes challenge, Miner 2049ER™ is a gold mine.

You're racing against the clock and menacing aliens to build a space platform. As soon as you're done, there's another, different shaped platform to be built — and the aliens are still gobbling, the clock's still ticking! You can't beat it, but you can get better at it.

CROWN OF ARTHAIN

High adventure as two medieval princes battle for their father's crown

micro fun™

THE COMPUTER ENTERTAINMENT DIVISION OF MICROLAB, INC.

CROWN OF ARTHAIN™

A suspense-filled 20 level quest for one or two players with battle action at every turn.

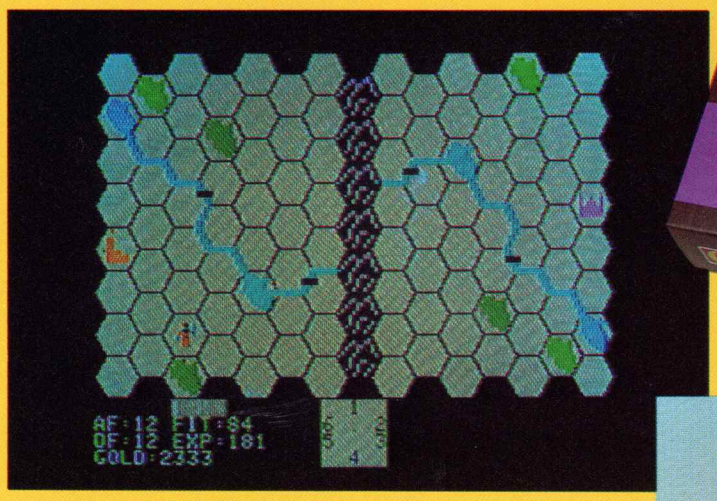

You and your brother have been long gone from your father Arthain's mountain kingdom. So you have forgotten the many caves and passageways in which Arthain's magical crown could lie.

Now the dying king has summoned you and your brother to come and search for the crown. To the finder goes the kingdom.

But between you and the fabled crown stand formidable obstacles. Evil elves whom you must trick into helping you. Pernicious trolls who sabotage you at every turn. Monsters who could destroy you. The forbidding terrain of the mountain kingdom. And, of course, your very own brother, who is rotten enough to do anything he must to foil you and claim the crown for himself.

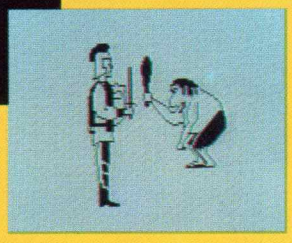

You have to search for clues. Battle dragons. And summon all the daring, strategy and knightly resources of your royal bloodline. Who said it's easy to become a king?

Hidden in the map are gold and other treasures you'll need to seek the crown.

But search too long in any hex and you'll be spotted by an ogre, wraith, ghost or monster who will engage you in a fight for your life!
